

## **SUGGESTED AUDIO-VISUAL SET UP**

**Presentation Format - HDMI connector using Apple Keynote on personal Mac Lap Top**

**If IMAG is used, a down stage monitor (DSM) exclusively for Derek's slides is a must**

**Derek will not use a podium - a small table for notes on stage or floor is requested**

**Lapel wireless or headset mic**

**Audio patch required for embedded video**

### **Note:**

Derek usually sets up at least one hour before his presentation

Derek will provide the laptop and remote control. The laptop can be positioned anywhere in the room

His Introduction Video is embedded in his slide deck (plays 2:30)

If available, a stage facing clock is recommended but not imperative
